CHANDUBHAI S. PATEL INSTITUTE OF TECHNOLOGY (CSPIT)

Department of Computer Science & Engineering • CHARUSAT

StudentHub (Campusly) — Final Project Features & Requirements Satisfaction Report

Practical 15: Full Integration, Testing, Documentation, Local Deployment & Submission Proof

Student Name: Jay Navadiya

Student ID / Roll No: 25CS052

Course: ITUE203 - Web Development Frameworks

Semester / Branch: B.Tech CSE (Div-I)

GitHub Repo: github.com/cs-cspit/Student-Portal-25CS052

Database Engine: MySQL 8.x (3NF Relational Database `studenthub`)

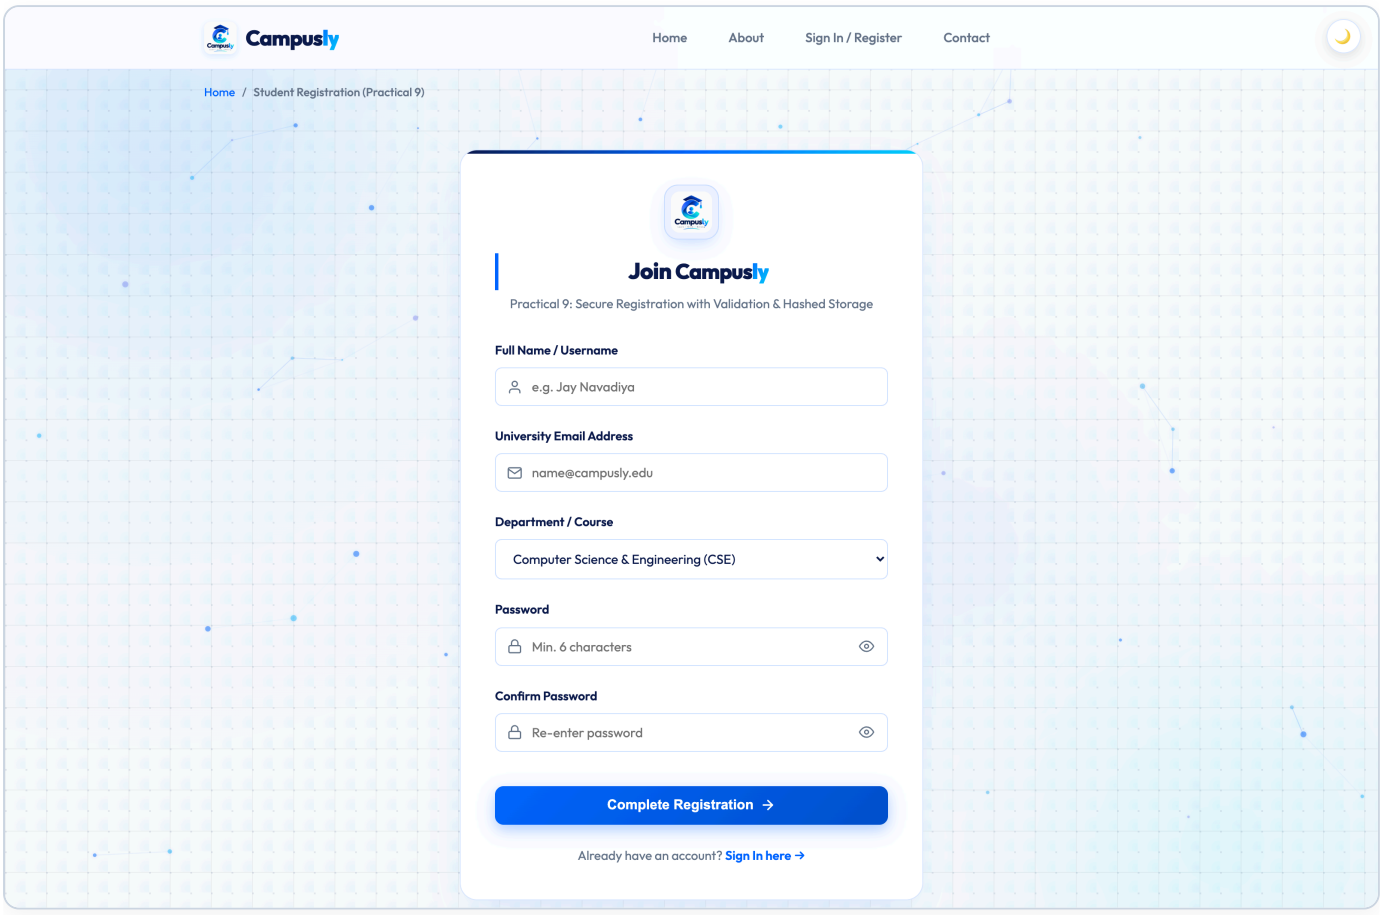

Executive Requirements & Features Satisfaction Matrix

Module / Requirement	Features Implemented & Demonstrated	Verification Proof	Status
User Registration	Full form validation, bcrypt password hashing, dual relational insertion (students + users)	Figure 1.1 - 1.4	100% SATISFIED
Session Inactivity Timeout	10-minute zero-drift epoch timer, 60s warning modal, stay logged in extension & auto-redirect	Figure 2.1 - 2.2	100% SATISFIED
Authentication & RBAC	Bcrypt verification, session fixation prevention, student/admin dynamic navigation, HTTP 403 barrier	Figure 3.1 - 3.4	100% SATISFIED
Executive Admin Dashboard	Dynamic relational statistics, monthly chart, user active/inactive toggle, relational audit logging	Figure 4.1 - 4.2	100% SATISFIED
Student Portal & Schedules	Personalized student dashboard, weekly timetable schedule, academic study materials repository	Figure 5.1 - 5.3	100% SATISFIED
Student Directory & AJAX CRUD	Asynchronous add modal, debounced live search, course filters, instant CSV export	Figure 6.1 - 6.3	100% SATISFIED
Campus Events Catalog	Card visualizer, poster validation, student event registration junction linking tables in 3NF	Figure 7.1	100% SATISFIED
Responsive Mobile Viewport	Mobile layout testing on 390px (iPhone 14 Pro), accessible touch targets, collapsible menu	Figure 8.1	100% SATISFIED
Local & Apache Deployment	Apache Virtual Host configuration (studenthub.local), MySQL database dump (studenthub.sql), Git origin	Figure 9.1 - 9.3	100% SATISFIED

1. User Registration & Dual-Layer Validation

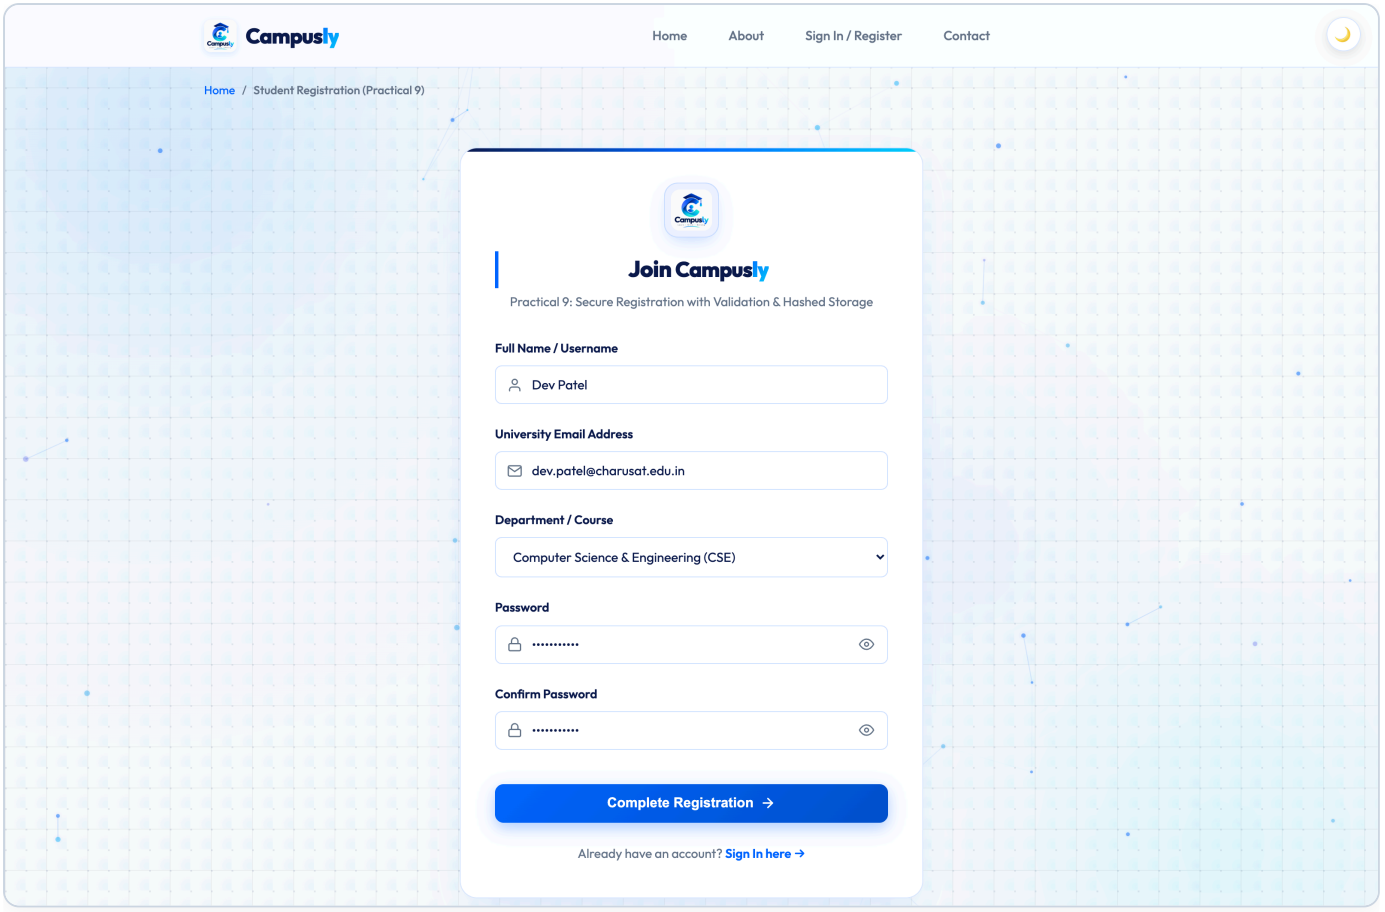

1.1 Student Registration Form Interface

Initial clean state of the student registration gateway (register.php) featuring input fields for Full Name, University Email, Department, Password, and Password Confirmation in portal light mode.

1.2 Registration Process: Form Filled with Student Data

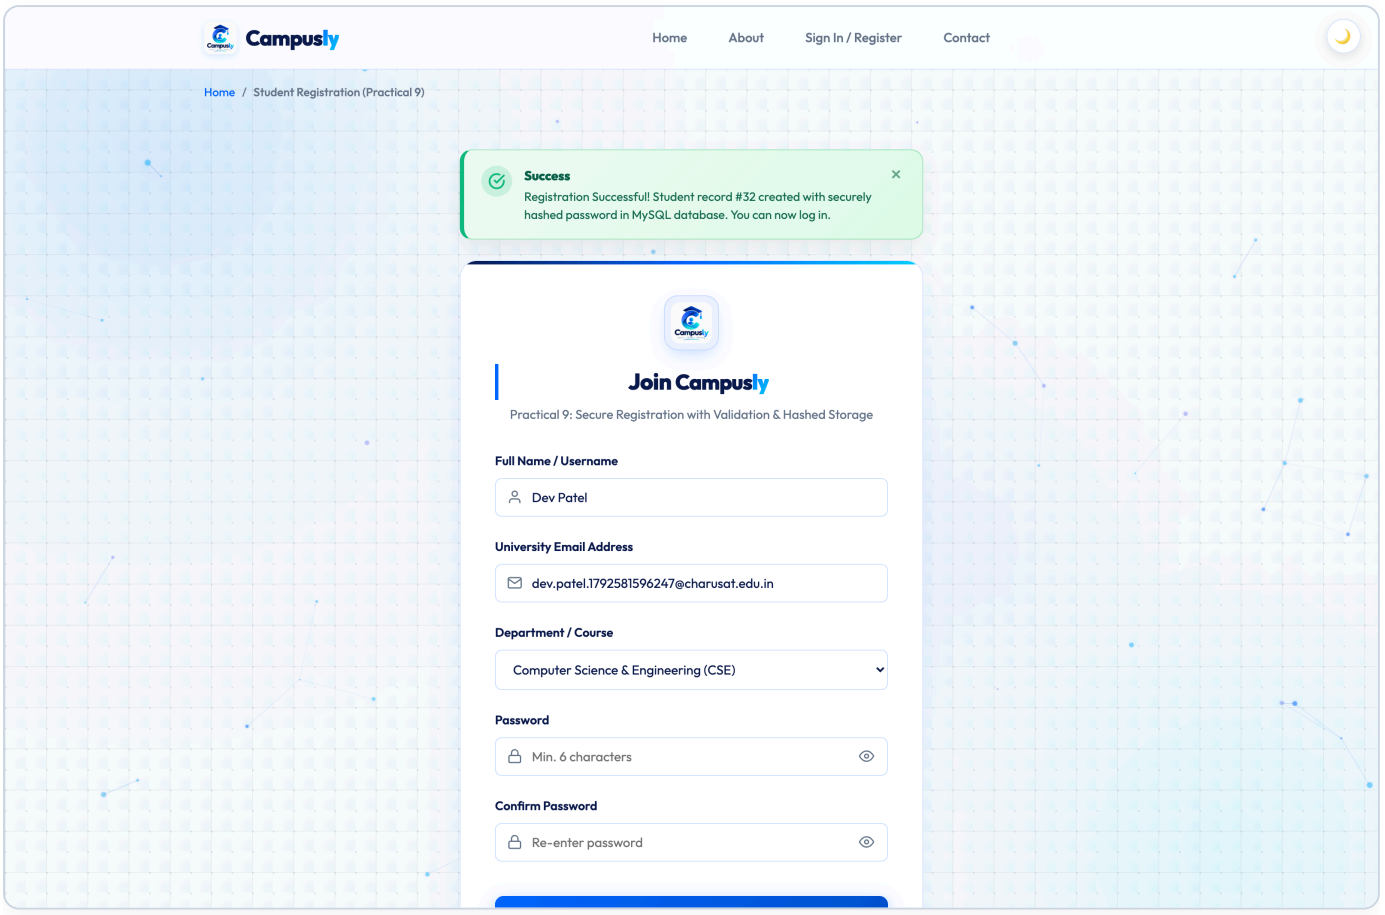

Registration form actively populated with student details (Dev Patel, CSE Department, credentials) demonstrating client-side validation checks before submission.

1. User Registration & Dual-Layer Validation (Contd.)

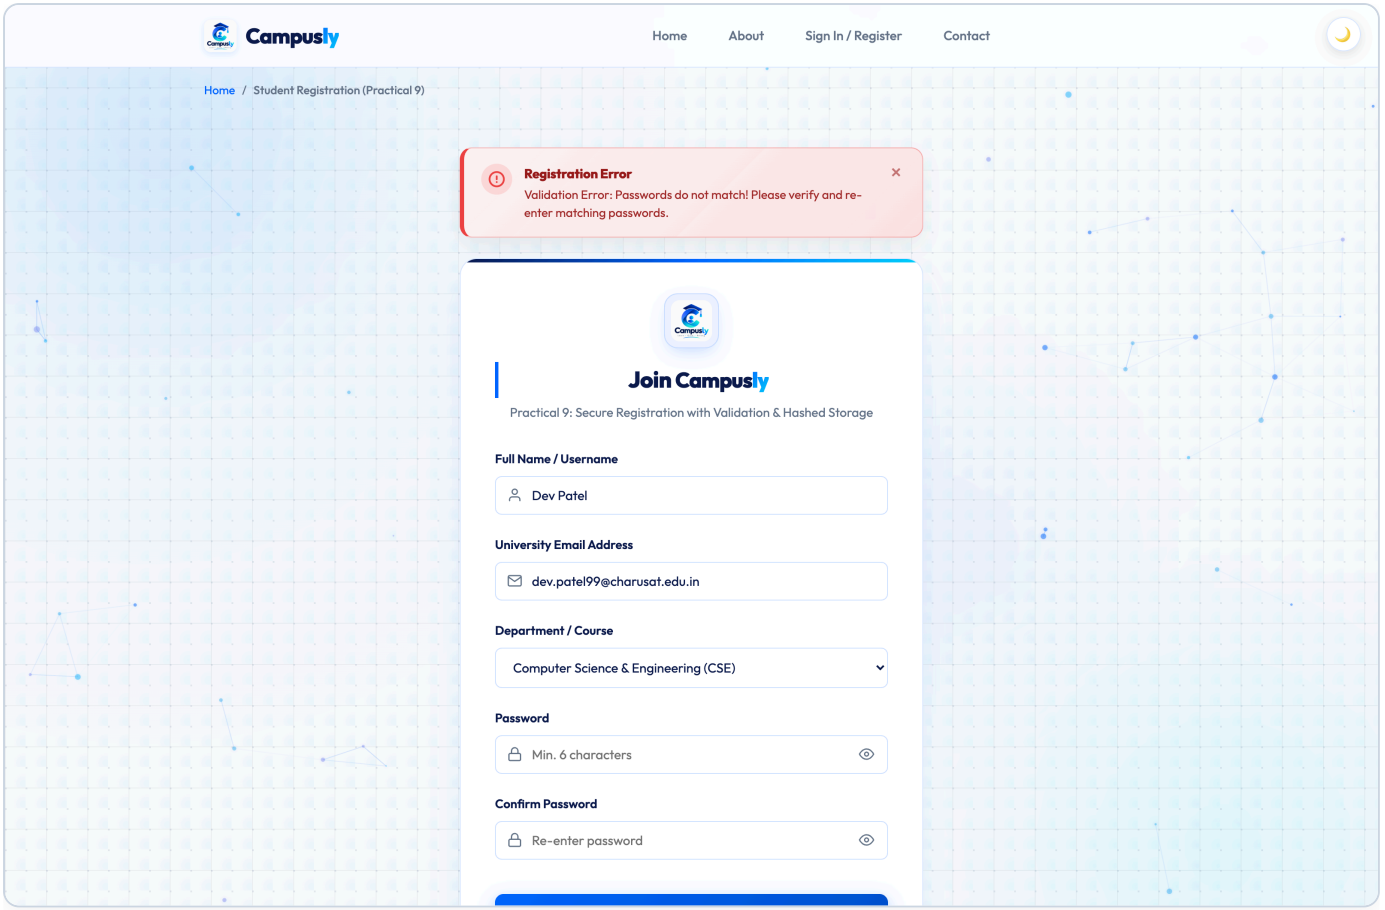

1.3 Successful User Registration & Relational MySQL Insertion

Visual confirmation of successful registration: A green notification alert confirms student record creation with securely hashed bcrypt password in the MySQL database (students and users tables).

1.4 Server-Side Validation Error Handling (Password Mismatch)

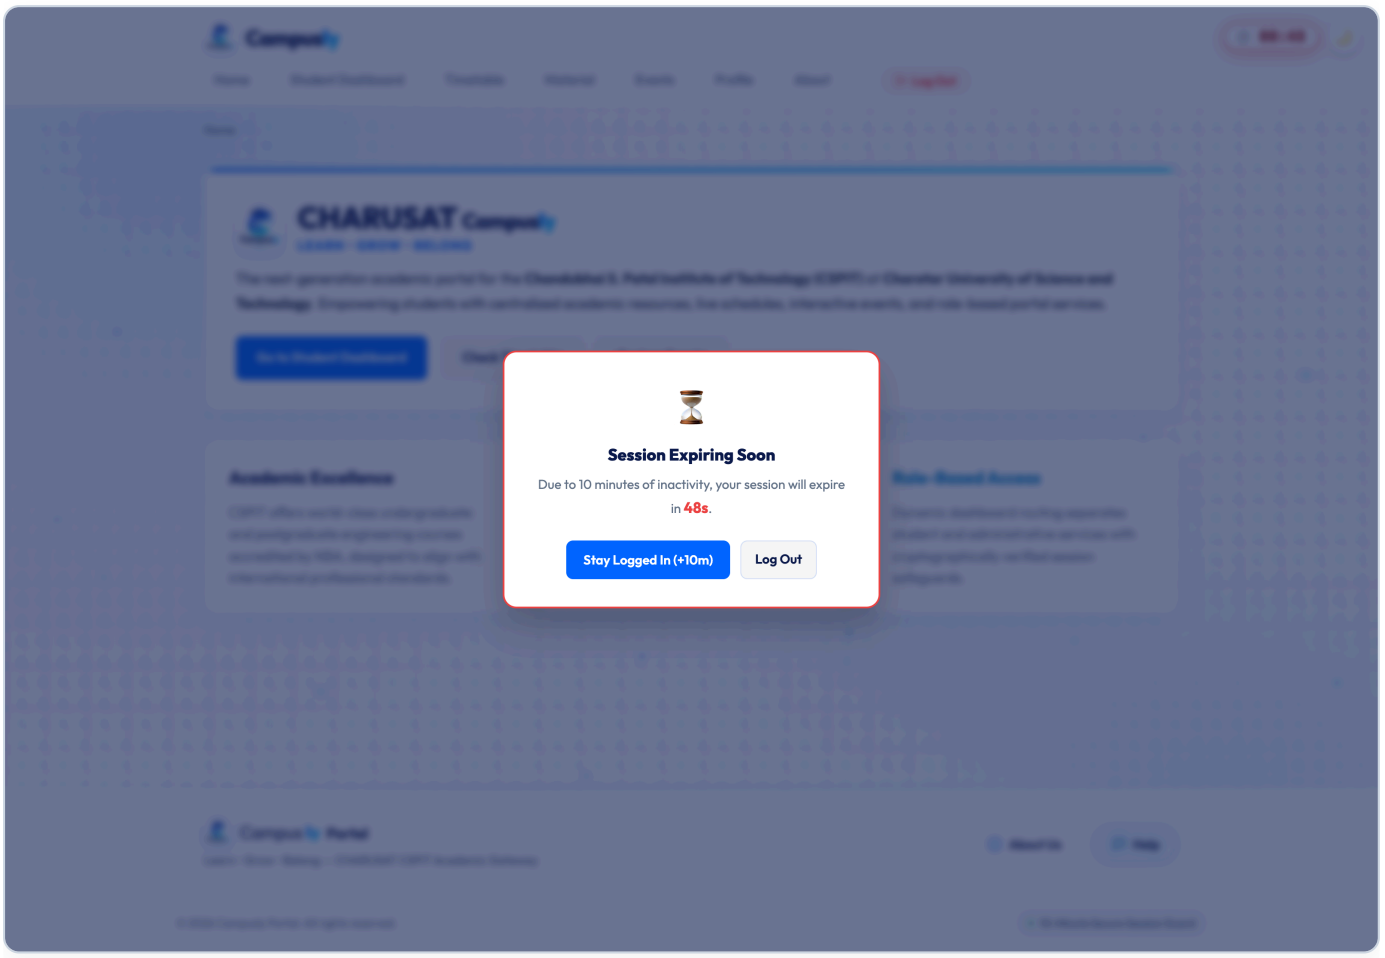

Demonstration of input validation safeguards: When password fields do not match, the portal displays a prominent validation notification preventing dirty data insertion.

2. 10-Minute Zero-Drift Session Security & Inactivity Timeout

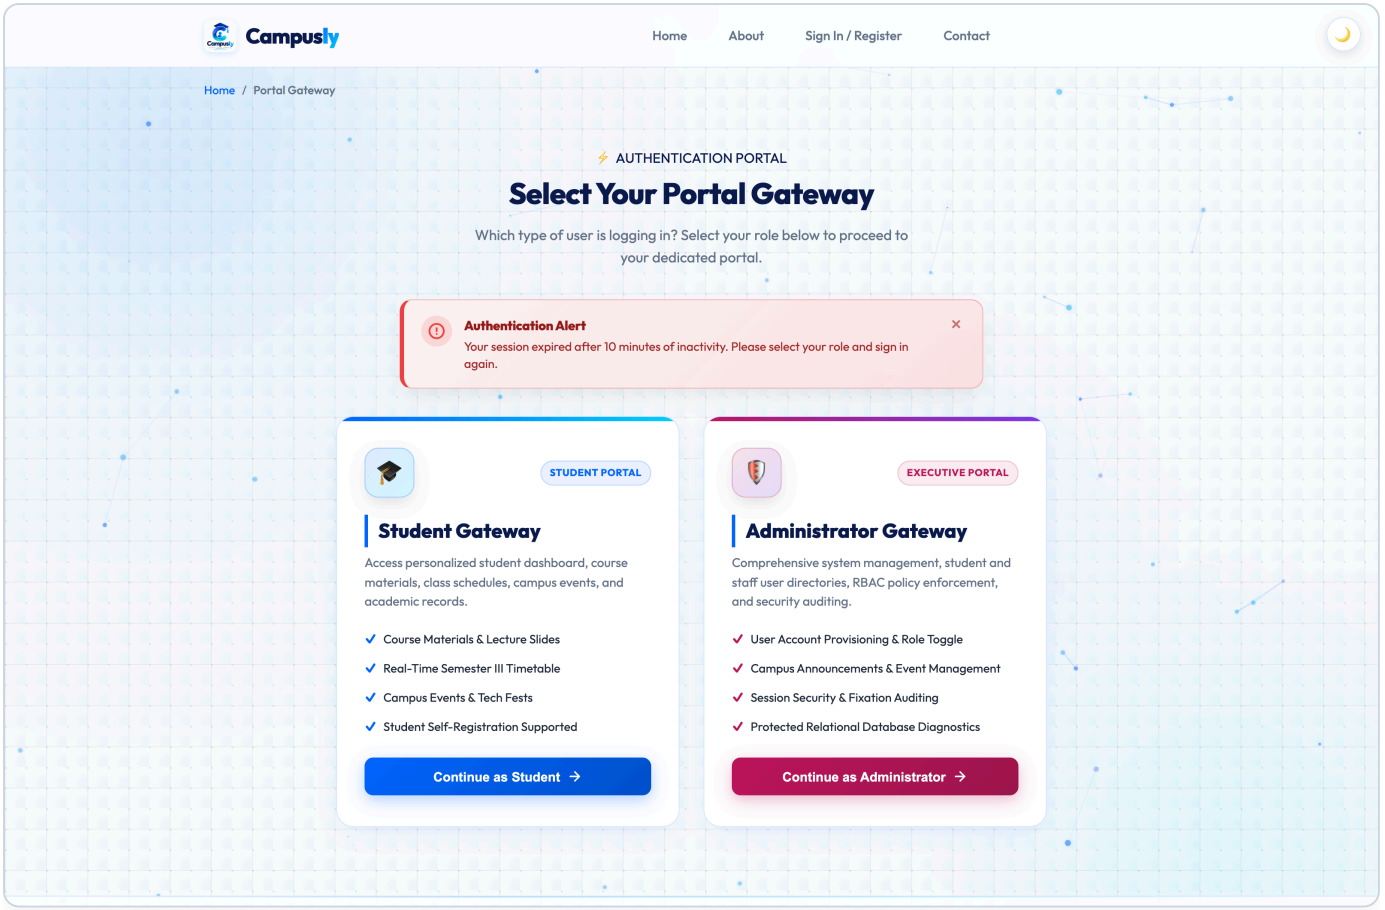

2.1 Session Timeout Warning Modal (Countdown Timer & Extension Action)

After 9 minutes of user inactivity, the portal triggers a non-intrusive warning modal displaying an active countdown (48s). Users can click "Stay Logged In (+10m)" to extend their session or "Log Out" to immediately terminate.

2.2 Session Invalidation & Automatic Redirect to Sign-In

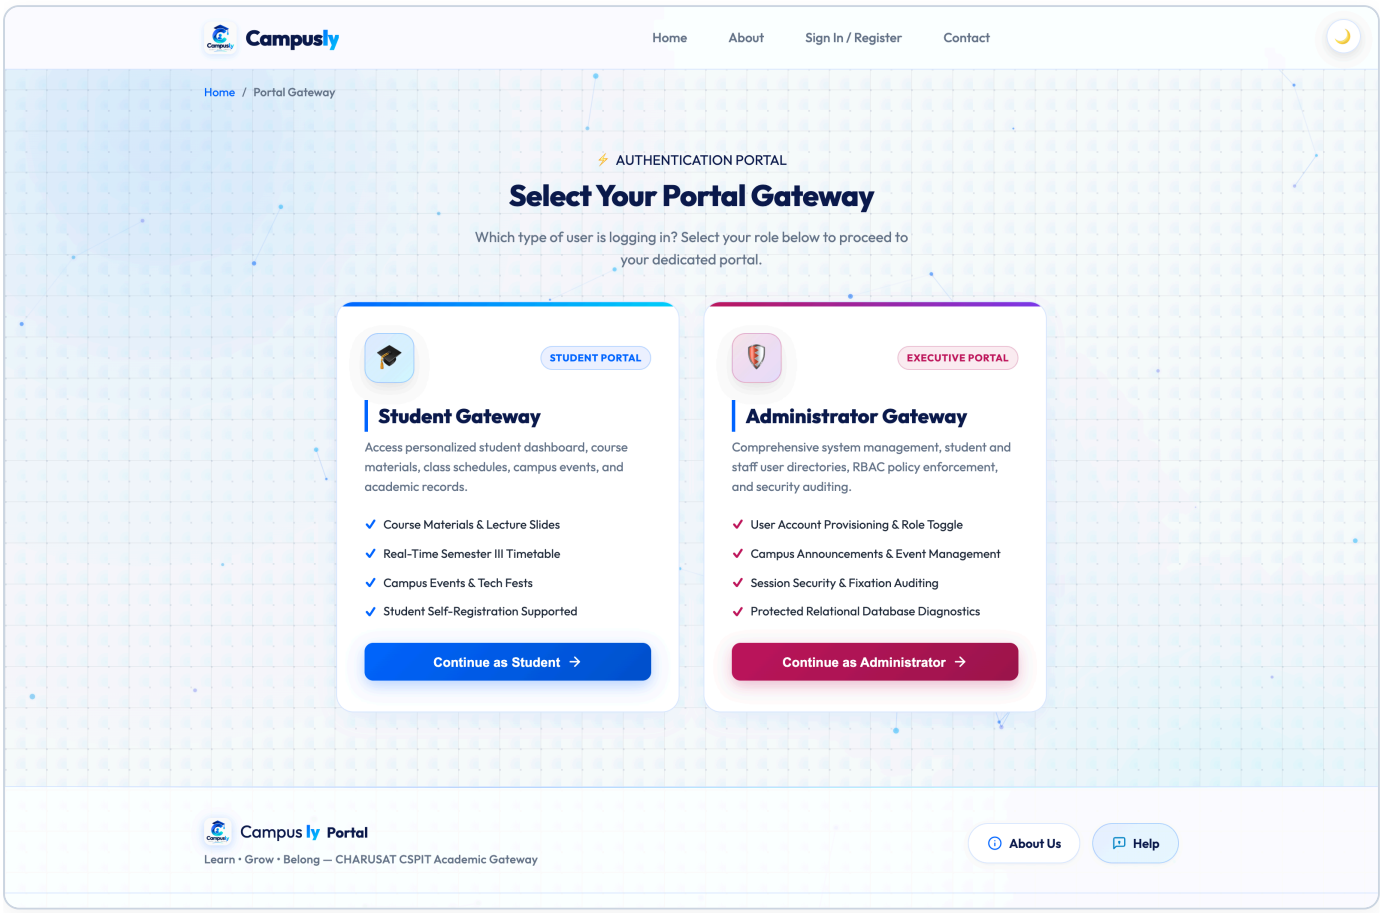

Upon complete session expiration (10 minutes), the server-side epoch guard invalidates the session cookie and redirects the user to login.php?msg=timeout with a clear notification informing them of session termination.

AUTHENTICATION PORTAL
Select Your Portal Gateway
Which type of user is logging in? Select your role below to proceed to your dedicated portal.
Authentication Alert
Your session expired after 10 minutes of inactivity. Please select your role and sign in again.
STUDENT PORTAL
Student Gateway
Access personalized student dashboard, course materials, class schedules, campus events, and academic records.
Course Materials & Lecture Slides
Real-Time Semester III Timetable
Campus Events & Tech Fests
Student Self-Registration Supported
Continue as Student
EXECUTIVE PORTAL
Administrator Gateway
Comprehensive system management, student and staff user directories, RBAC policy enforcement, and security auditing.
User Account Provisioning & Role Toggle
Campus Announcements & Event Management
Session Security & Fixation Auditing
Protected Relational Database Diagnostics
Continue as Administrator

3. Authentication Gateway & Role-Based Access Control (RBAC)

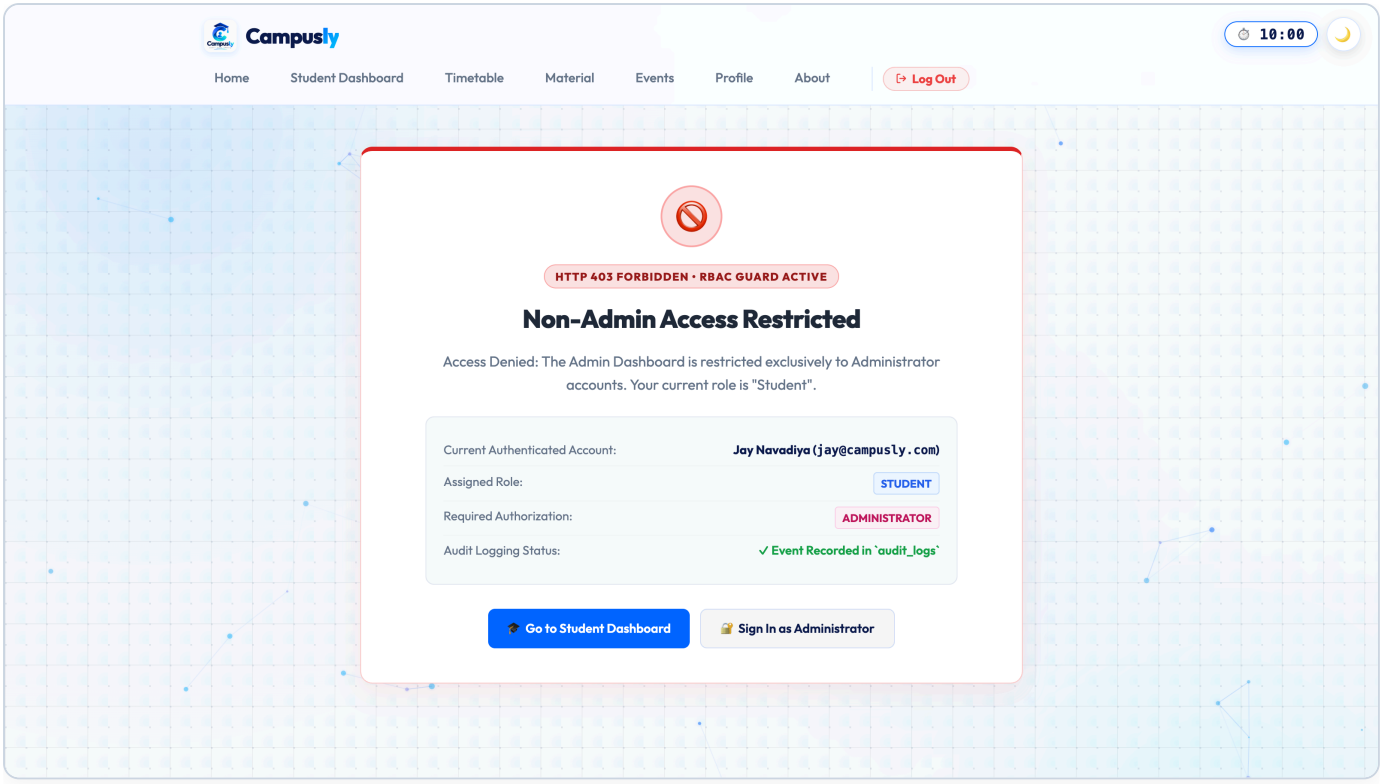

3.1 Authentication Gateway & Dual-Role Switcher

Unified login portal (login.php) with instant role-switching pills (Student and Administrator), demo account prefill pills, remember-me token option, and clean light-themed inputs.

3.2 Role-Based Access Control Interception (HTTP 403 Forbidden Alert)

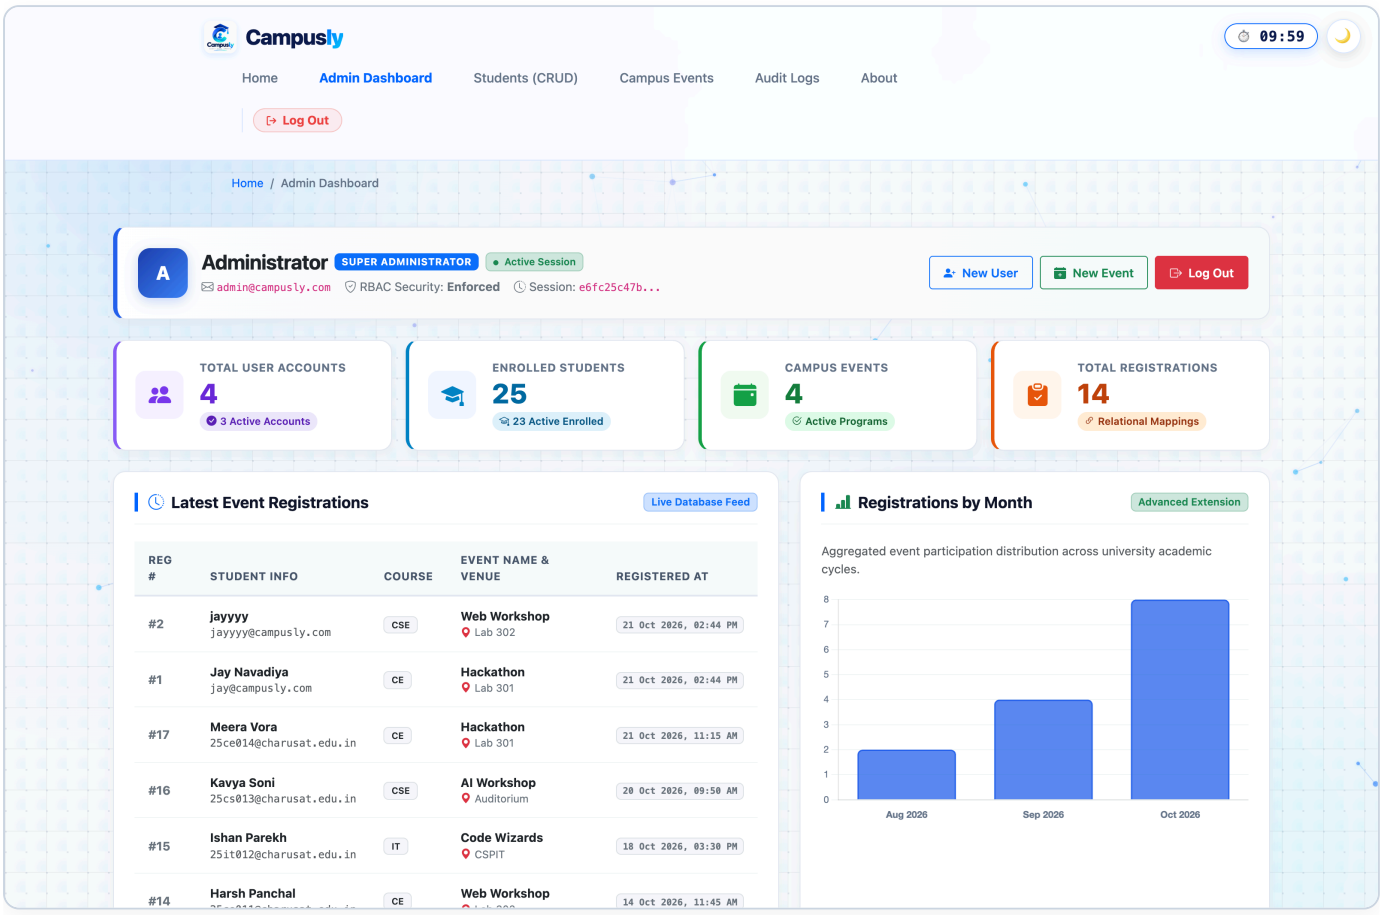

Strict security barrier: When an authenticated Student (Jay Navadiya) attempts to access restricted Admin routes (/dashboard.php), the system intercepts the request, blocks execution with HTTP 403, and records an audit log.

4. Executive Admin Control Center, Analytics & Audit Logging

4.1 Executive Admin Dashboard with Dynamic Statistics & Registration Chart

Administrator overview (dashboard.php) featuring live database KPIs (4 Users, 25 Enrolled Students, 4 Events, 14 Registrations), latest relational registration feed, and Chart.js monthly analytics.

4.2 Relational Security Audit Trail (audit_logs Table Verification)

Full traceability log tracking administrative actions and security violations (LOGIN_SUCCESS, USER_STATUS_TOGGLE, UNAUTHORIZED_ACCESS_403, EVENT_CREATE) with IP addresses and timestamps.

Audit Log Trail (`audit_logs`)

Complete traceability record showing all administrative updates, logins, status toggles, and security violations.

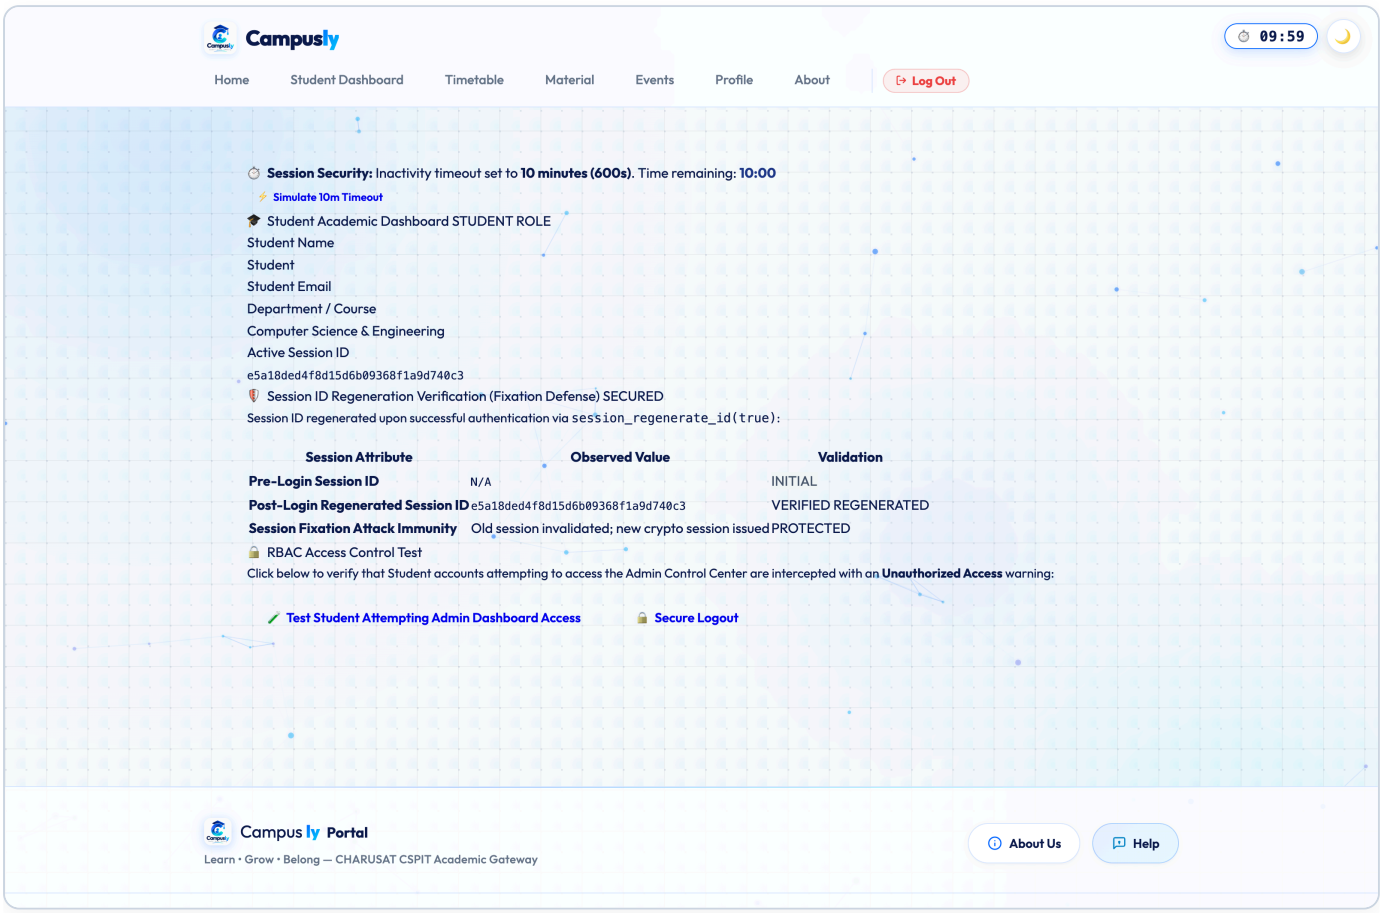

26 Total Recorded Events

LOG ID	TIMESTAMP	USER & ROLE	ACTION TYPE	ACTION DETAILS	IP ADDRESS

5. Student Academic Portal, Schedule & Study Materials

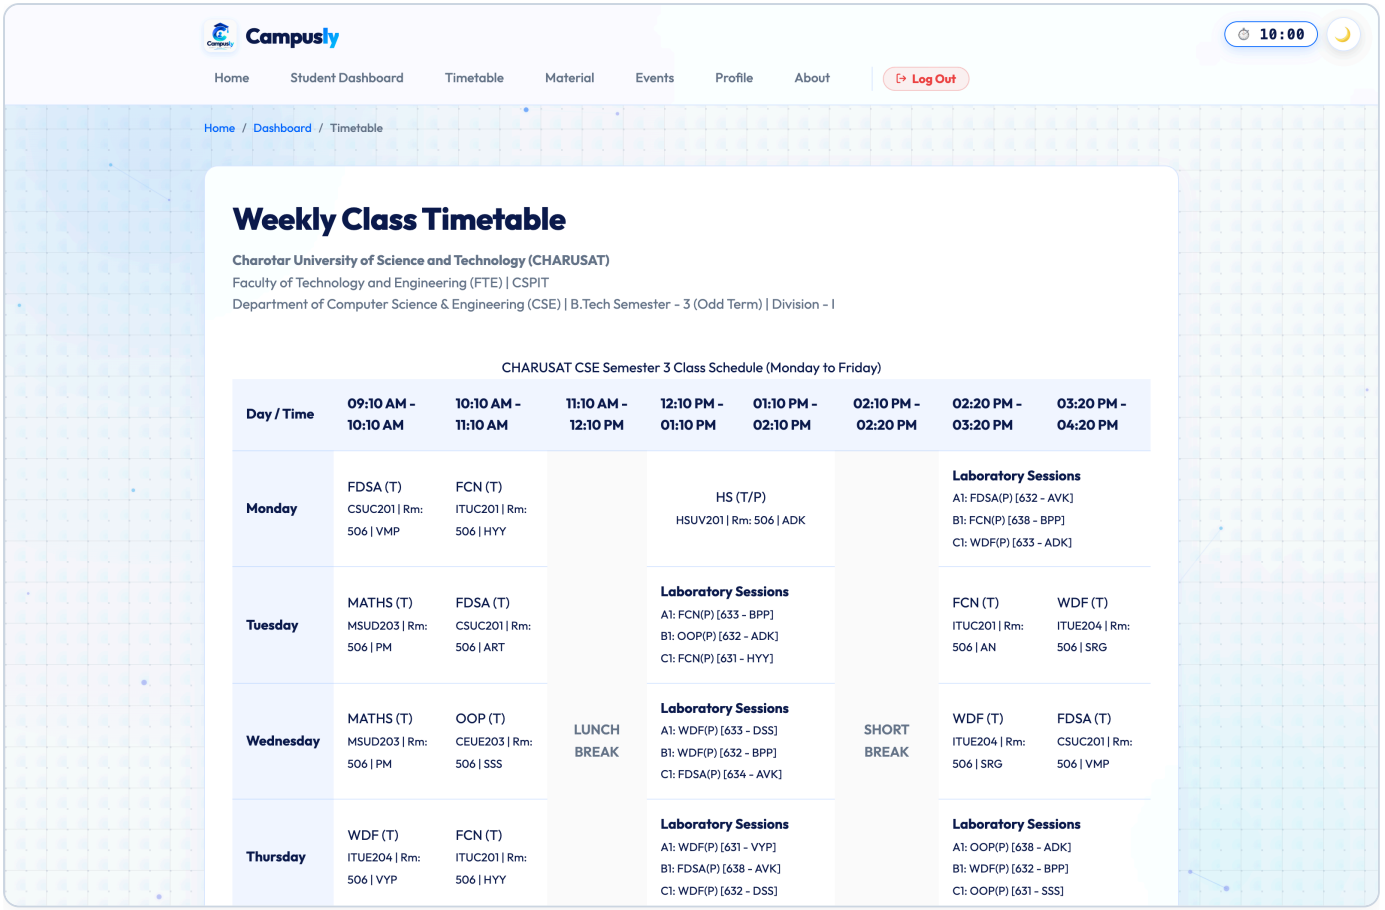

5.1 Personalized Student Academic Dashboard (student_dashboard.php)

Personalized student view for Jay Navadiya (B.Tech Computer Engineering) displaying academic status, registered event badges, and quick links to course resources.

5.2 Academic Class Timetable & Lab Allocations

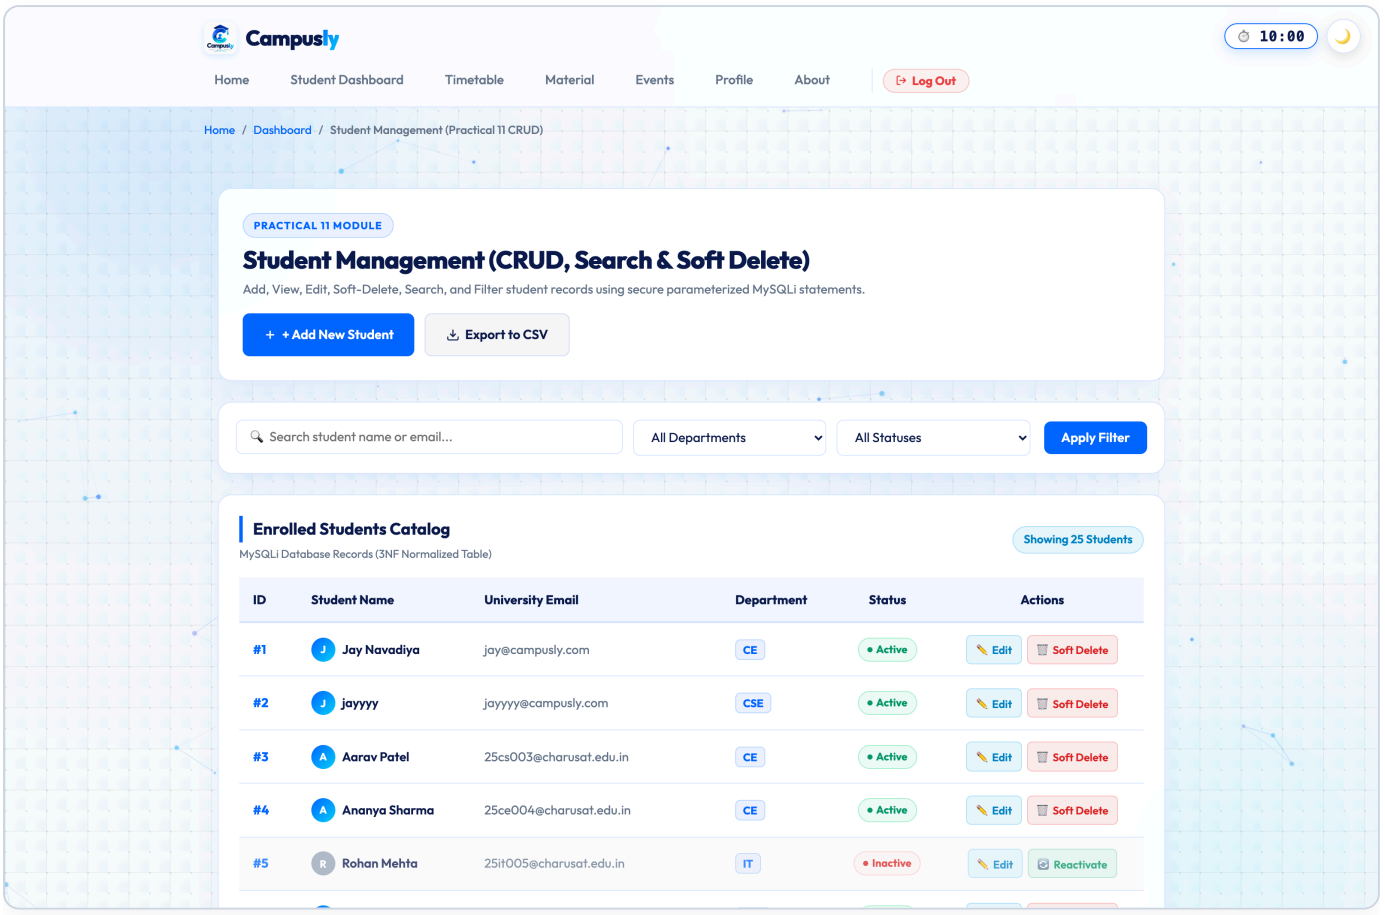

Weekly class timetable (timetable.php) displaying time slots, course codes (ITUE203, CE204), faculty names, and designated laboratory numbers.

6. Student Directory Management & Asynchronous AJAX CRUD

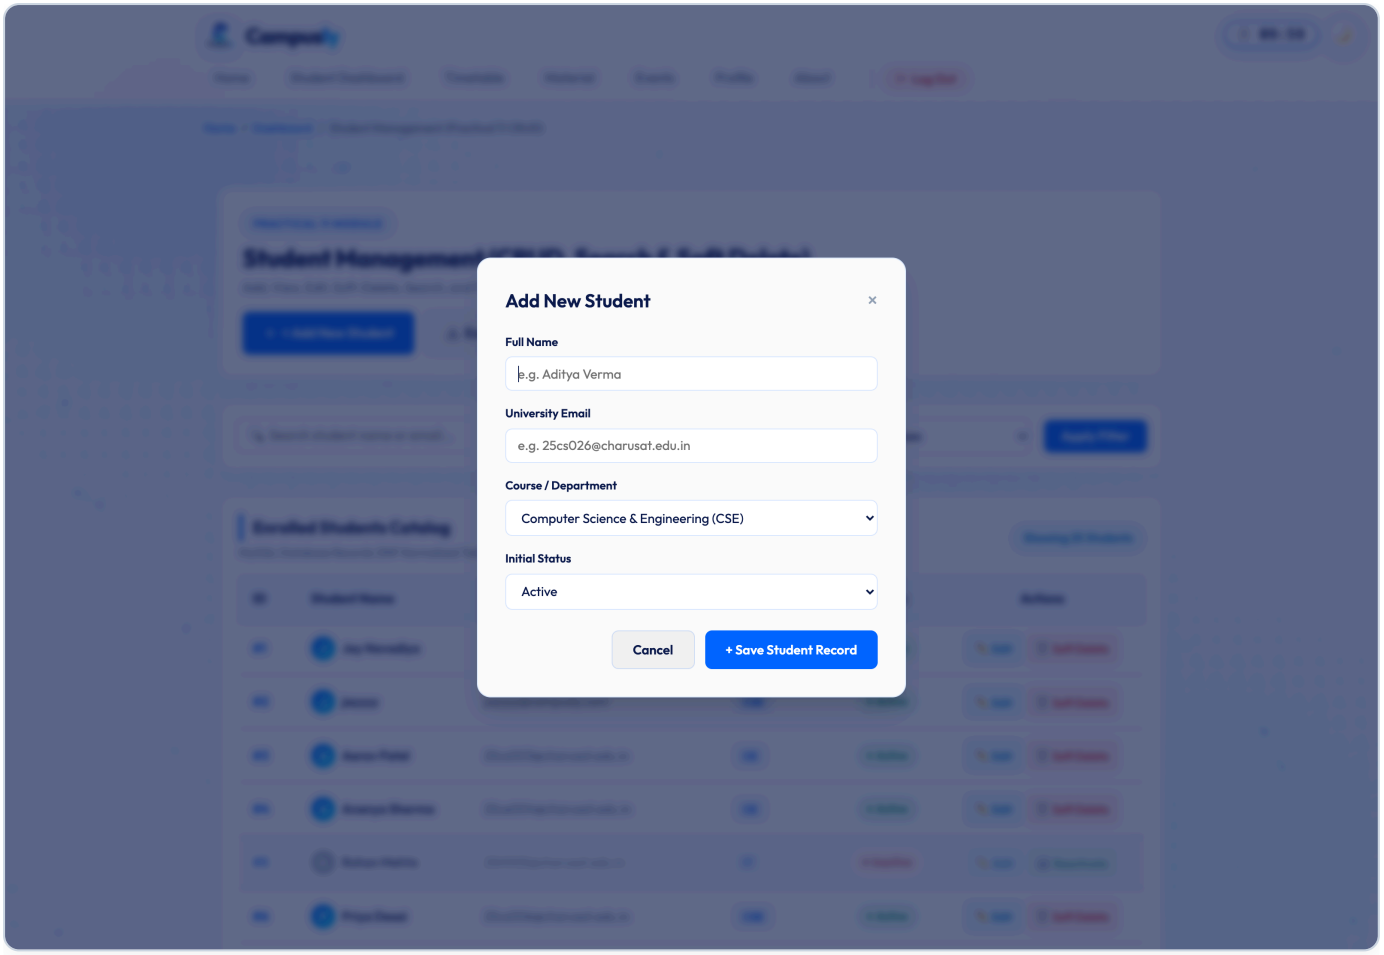

6.1 Enrolled Students Directory Interface with Department Badges

Student management directory (students.php) showing 3NF relational records with Department badges (CSE, CE, IT, EC), status badges, and action buttons.

6.2 Asynchronous AJAX Add Student Modal Dialog

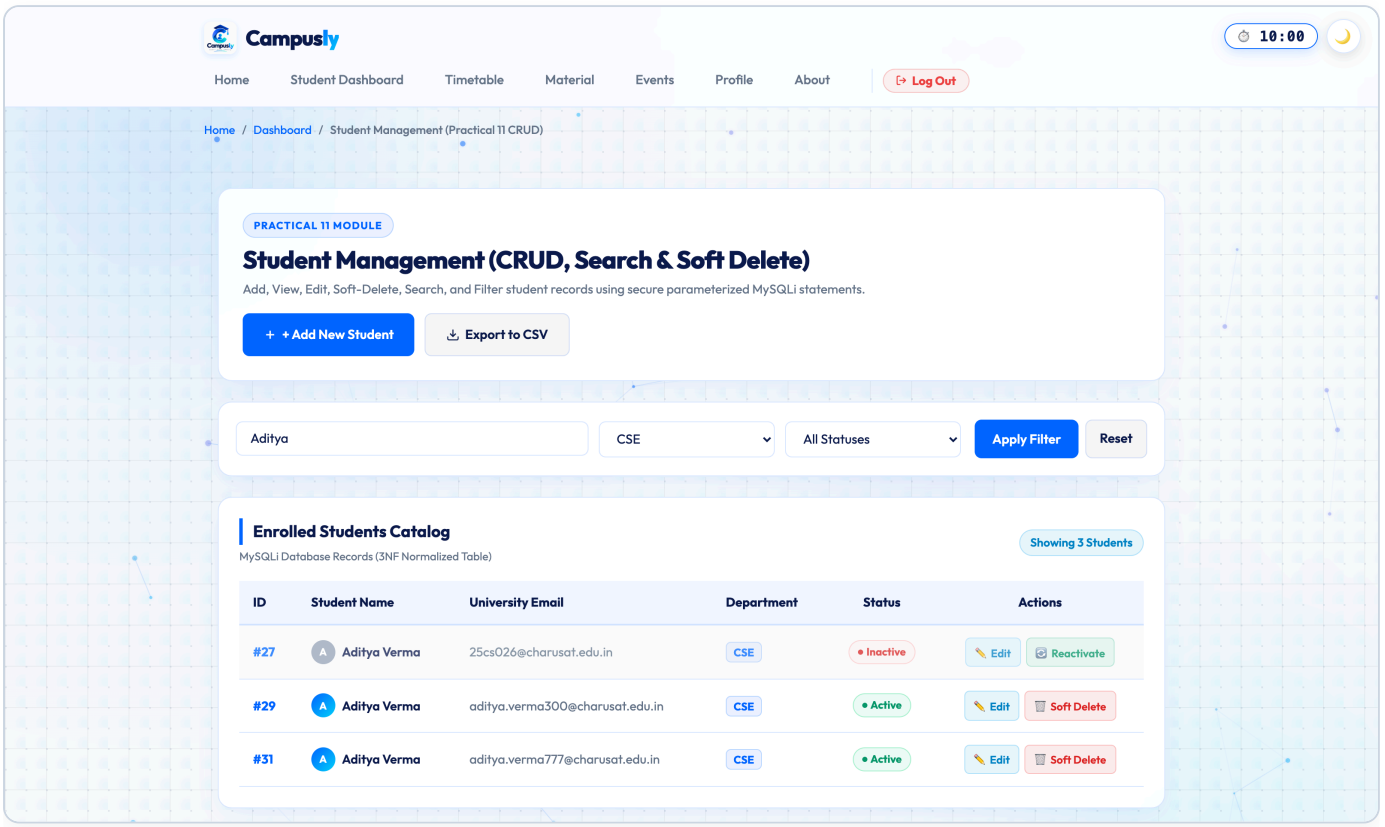

AJAX Add Student modal dialog open in light theme mode, enabling seamless record insertion without reloading the page.

Add New Student

Cancel
+ Save Student Record

6. Student Directory Management & Asynchronous AJAX CRUD (Contd.)

6.3 Live Keystroke Debounced Search & Department Filtering

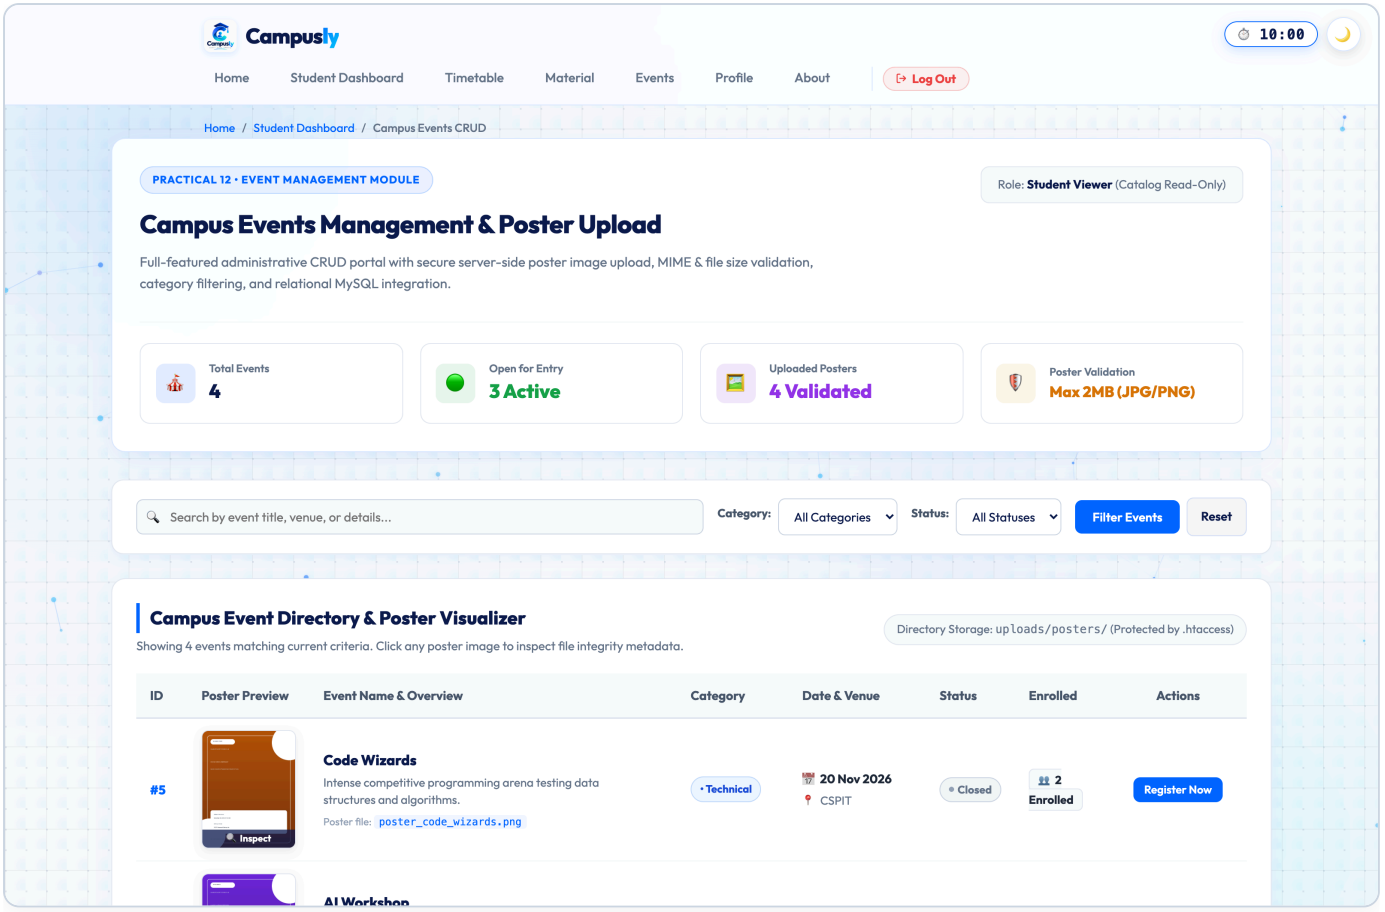

Real-time filtering: Typing search keywords ("Aditya") and selecting department ("CSE") instantly updates the records table via RESTful API queries without full page refresh.

7. Campus Events Catalog & Relational Registrations

7.1 Campus Events Catalog & Event Registration Junction

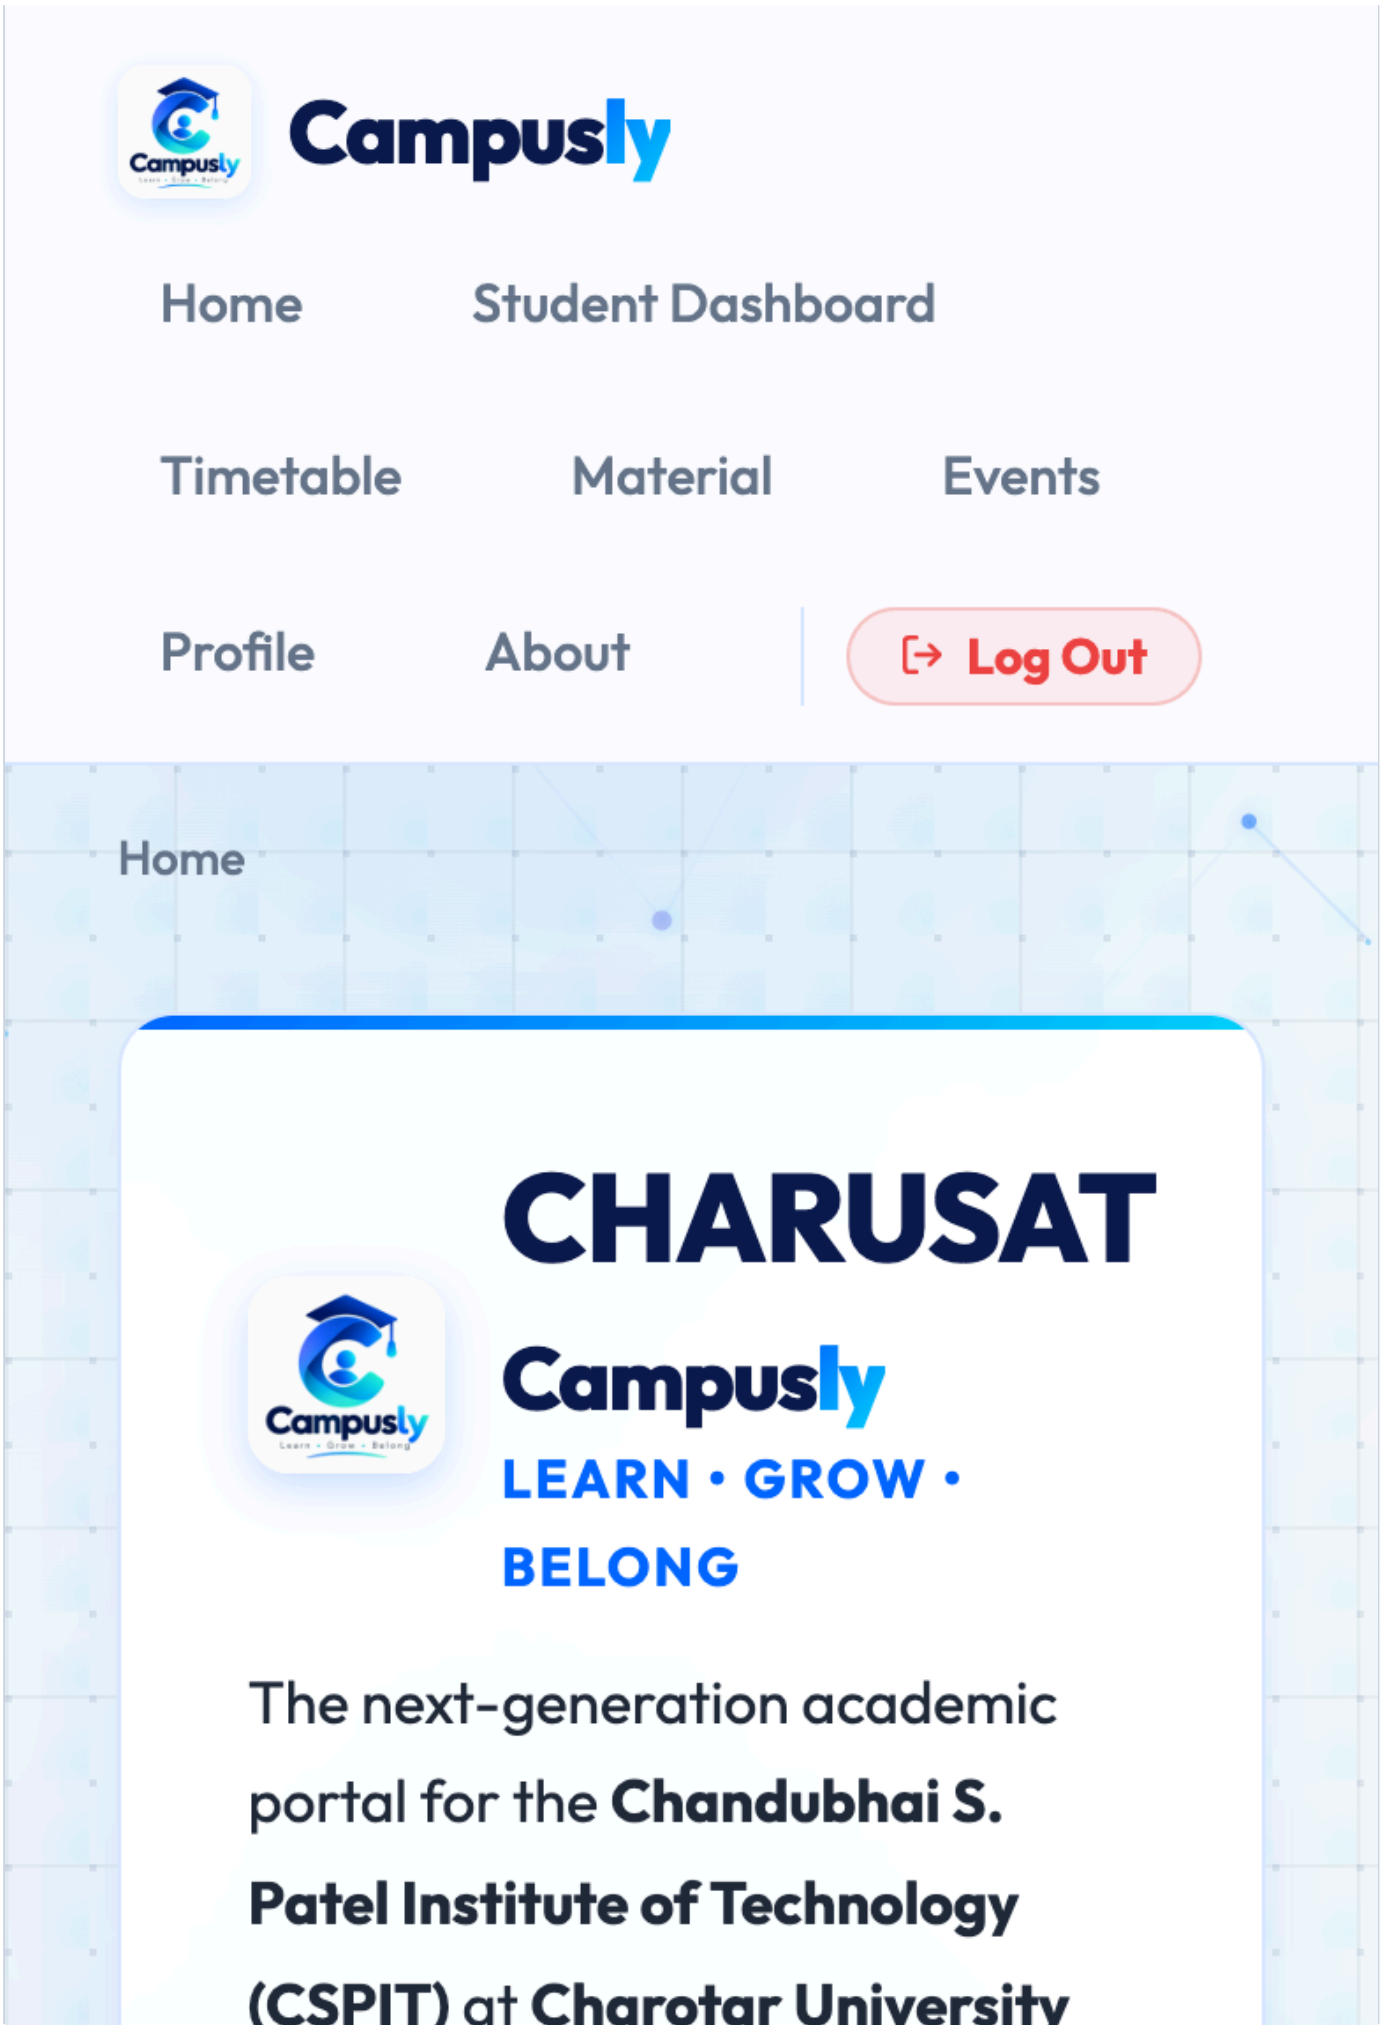

Campus events catalog (events.php) showcasing event posters (Hackathon, AI Workshop, Code Wizards), venue schedules, and live registration buttons linked via 3NF foreign keys.

LEARN • GROW • BELONG
The next-generation academic portal for the Chandubhai S. Patel Institute of Technology (CSPIT) at Charotar University

9. Local Deployment, Database Dump & GitHub Submission

9.1 Apache Virtual Host Local Deployment (apache_studenthub_vhost.conf)

Turnkey VirtualHost configuration for deploying StudentHub locally under the domain http://studenthub.local on Apache 2.4 / XAMPP with mod_rewrite activated.

Apache Virtual Host Local Deployment Configuration (`apache_studenthub_vhost.conf`) Intermediate Extension Verified

```
# ======================================================================
# Practical 15: Apache Virtual Host Configuration for StudentHub Portal
# System: StudentHub Academic Management Portal (CSPIT, CHARUSAT)
# Domain: http://studenthub.local
# Document Root: /Users/jaynavadiya07/Desktop/Project
# ======================================================================

# 1. macOS / Linux Apache Virtual Host Definition
<VirtualHost *:80>
    ServerAdmin admin@studenthub.local
    ServerName studenthub.local
    ServerAlias www.studenthub.local

    DocumentRoot "/Users/jaynavadiya07/Desktop/Project"

    <Directory "/Users/jaynavadiya07/Desktop/Project">
        Options -Indexes +FollowSymLinks +MultiViews
        AllowOverride All
        Require all granted

        # Priority Directory Index
        DirectoryIndex index.php index.html

        # URL Rewrite Engine for RESTful API and Clean Routing
        <IfModule mod_rewrite.c>
            RewriteEngine On
            RewriteBase /
            RewriteCond %{REQUEST_FILENAME} !-f
            RewriteCond %{REQUEST_FILENAME} !-d
            RewriteRule ^(.*)$ index.php [QSA,L]
        </IfModule>

        # Security Headers
        <IfModule mod_headers.c>
            Header always set X-Frame-Options "SAMEORIGIN"
            Header always set X-Content-Type-Options "nosniff"
            Header always set X-XSS-Protection "1; mode=block"
            Header always set Referrer-Policy "strict-origin-when-cross-origin"
        </IfModule>

    # Access and Error Logs
```

9.2 MySQL studenthub Database Dump & Table Counts Verification

Database verification proving full 3NF relational integrity: Table counts confirm 25 Students, 4 Events, 14 Registrations, 4 Users, and 25+ Audit Logs.

MySQL Database Dump & Verification: `studenthub` Database

Practical 15 Relational 3NF Schema

```
$ mysql -u root -e "USE studenthub; SHOW TABLES; ... counts"

Tables_in_studenthub
audit_logs
event_audit_log
events
registrations
students
users
tbl     count
events  4
students        25
registrations   14
users   4
audit_logs      29
```

Database Dump File: **studenthub.sql** (217 lines, InnoDB, utf8mb4)

Status: **All Foreign Keys & Constraints Verified**

9. Local Deployment, Database Dump & GitHub Submission (Contd.)

9.3 GitHub Repository Submission & Clean Git History

Git terminal output confirming remote origin (git@github.com:cs-cspit/Student-Portal-25CS052.git), branch main up-to-date, and clear semantic commit history.
